### Abstract

Civic Education (PKn) has an urgency in shaping students' character, especially in terms of compliance with the norms that apply in schools. This study aims to examine the relationship between Civics teaching and the level of student compliance with school regulations. With a descriptive qualitative approach, data were collected through literature studies and observations of student behavior. The results of the study showed that PKn which was given contextually and participatively was able to shape students' awareness of rules and discipline. Therefore, Civics must be optimized not only as a theoretical subject, but as a means of developing students' character as a whole.

**Keywords :** Civic Education, student compliance, school norms, character, regulations

### Introduction

Education is something efforts made in a way aware and also have planned as a learning process to ensure every man become person of character good, knowledgeable, moral noble, thoughtful logical, creative, and able responsible. Education can also be done it is said as one of the the road that is passed by some man in determine the future ( Suwahyu , 2019). With education, children nation can determine how direction life in the future. Life will Keep going walk without know time, children will growing also starts experience development, and become man future adults can become successor great and dignified tall in accordance with education taken during school time. In connection with that, the goal of national education is enlightening life nation and develop the whole Indonesian human being, namely a man of faith and piety towards god almighty and virtuous character noble, have knowledge and skills, health physical and spiritual, steady and independent personality and a sense of responsibility answer society and nationality. With existence education, then will arise in self somebody for compete and motivate self we for more good in all aspect life. Education is one of the condition for more advance government this, then try education start from elementary school level up to education at university level. Civic education is something effort conscious and planned enlightening citizens (especially generation young). The way with foster national identity and morals to be able to participate active in national defense. Civic education teach to participant educate about values, norms and morals. With practice values, norms and morals so will created character discipline in self students. With discipline this is the educational process that takes place at school will ongoing with good, because student no do violation rule rule school. Discipline is mental attitude of a person who is pregnant willingness comply with applicable provisions , regulations and norms in fulfill duties and responsibilities responsible . answer, both related with time and to obligations and rights. Another definition of discipline expressed by Siswanto (2001) looking at that discipline is something attitude honor, appreciate, obey, and obey to applicable regulations , whether written and no written as well as able run it and not dodge for accept the sanctions if he violate tasks and authorities assigned to him.

## Result & Discussion

In citizenship education learning, there are material regarding norms and discipline. Thus, civic education can made into as guidelines in discipline norms in students especially at school the general basis consists of from expected children will become more good in behave including in disciplining norms in children since child sitting on a bench school base. Learning civics load material regarding norms, discipline, and rule in life School and society. Civics own role strategic in form behavior students to be able to understand and apply norms with good. According to Winataputra (2015), civics no only aim give knowledge, but also culture moral values and norms through a meaningful learning process. Wahab & Sapriya (2011) confirms that civics print responsible citizens answer through internalization social values and morals. Formation discipline student no happen in a way instant, but rather through habituation, role model, and learning in environment school. Samani & Hariyanto (2013) explain that character education must implemented in a way consistent through activity schools and formal learning. Research Aulia & Hakim (2020) found that Civics can increase understanding student about discipline if delivered with method dialogical and contextual. Putri & Santoso (2022) emphasized that strengthening social norms in learning civics influential significant to behavior orderly students. Siregar & Lubis (2021) also stated that civics effective in form character discipline when the teacher carries out learning based exemplary behavior and practice directly. This is reinforced by Hastuti (2020) who emphasized importance culture school like habit of queuing, praying, guarding cleanliness, and obeying the rules for strengthen values civics.

Civic education own a very important role in In elementary school civics learning, discipline and norms are very important for implanted since early. Because of discipline beneficial as standard handle life. In the lesson education citizenship explained regarding the norms whose contents includes rules and regulations in life family, school rules, norms that apply in society, regulations area, norms in life nation and state. Therefore that, education citizenship own a very important role as guidelines discipline norms in students school basic. System education in our country emphasizes the formation of participant students who have a sense of nationalism and love homeland and characterful with uphold tall discipline in comply with applicable norms. From the existence of matter said, education citizenship that will be play a role in form participant students who have a sense of nationalism and love homeland and obey the rules that apply in society. Discipline norms in students school base it is really necessary, because discipline entry norms to in formation character in children. If, child young get direction and teaching regarding norms and discipline so child will grow become appropriate personal with identity nation. Civic education can play a role as a medium in development discipline norms for students at school basic. This is lead to citizenship education become very important in the process of developing the nation's next generation. Therefore, the success of civic education will be very necessary. This naturally will can achieved with various efforts and innovations in implementation learning civics.

## Conclusion

Civic education play role important in implant compliance student to the rules and norms that apply at school. Through approach relevant learning with life students and involve participation active, civics can grow attitude discipline as well as awareness will importance life orderly since level school basic. This is very influential to formation personality responsible students responsible, moral, and have spirit nationality.
