### Abstract

This study aim for analyze interest study elementary school students moment using wordwall media in Citizenship Education (PKn) learning. Citizenship education in schools basics are also purposeful for develop attitude good social, moral and ethical behavior in students. They taught for become responsible individual answer, care to environment around, and capable interact in a way positive with fellow. Method used is review literature systematic. A total of 5 articles have been published published accordingly with theme as answer in this study. Research result show a number of aspect in environment education can influence development interest learning, which is component important from this process. as well as learning media is one of possible factors influence interest study student elementary school. Personal interests also arise moment somebody enjoy something activities, which encourage ongoing and more engagement deep in the learning process. Utilise various types of learning media and approaches creative in convey information can help guard interest student still stay awake and avoid boredom.

**Keywords :** Elementary school, learning citizenship, education

### Introduction

Education at school base is stage beginning in the formal education process for every individual. In this context is education at school base aim for give basics knowledge, skills and attitudes required for development holistic participant educate. In level this is learning no only focuses on aspects academic like reading, writing, and arithmetic, but also includes development skills social, emotional, and skills cognitive other (Djamaluddin, 2014). Through customized curriculum with development children at age that, school base give experience fun and challenging learning for students, which helps they understand the world around you they as well as form character and values positive. Apart from that, education at school fundamentals also play a role important in prepare student for continue education to more level tall. With give strong foundation in skills base like reading , writing and arithmetic, school base help strengthen foundation intellectual student so that they ready for explore field more study deep in the future (Julaiha et al., 2023). Education at school fundamentals also play a role in form positive attitudes and values, such as a sense of desire knowledge, cooperation, honesty and responsibility answer, that becomes base important in formation character student for become individuals who contributed positive in public. Subjects the is Citizenship Education (PKn). Civic education is an integral part of purposeful curriculum for form attitudes, knowledge, and skills student in understand, appreciate, and carry out right as well as obligation as good citizen. Through education citizenship, students taught for understand values base democracy, like justice, freedom, equality, as well as value diversity and pluralism in society (Rizka Wulandari et al., 2023) Citizenship education in schools basics are also purposeful for develop attitude good social, moral and ethical behavior in students. They taught for become responsible individual answer, care to environment around, and capable interact in a way positive with fellow. During the learning process, materials education citizenship usually covers knowledge about system government, history nation, culture local and national, rights basic humans, as well method participate in

life democracy, like election general and activities social society (Sire, 2018). Apart from that, education citizenship also becomes receptacle for form ability think critical and analytical student. They taught For analyze information, evaluate argument, and take the right decision based on their understanding have (Bukoting, 2023).

With thus, education citizenship at school base own very important role in form character and personality students, as well prepare they for become member an active, cultured and contributing society in a way positive for progress nation and state. Interest to learn student school base can influenced by various factor. One of them is method teaching used by teachers. Use interactive and fun approach can increase interest study student. Additionally, relevance material learning with life everyday too motivating student for more active in the learning process as well as with give example concrete and relevant, students will more easy understand the concepts taught (Fitri et al., 2020). With thus, the teacher has very important role in create environment supportive and stimulating learning interest study student. Interest to learn is trend individual for feel interested, enthusiastic, and excited in facing the learning process. It's involving feeling positive to material lesson, wish for deepen topic certain, and willingness for invest time and energy in learning. Interest in learning also includes motivation intrinsic, i.e internal drive to learn and grow, without influenced by factors external like present or punishment (Sirait, 2016). Influencing factors interest Study can varies, incl experience beforehand, needs and interests individual, as well environment study. Apart from that, success in reach objective you can learn too strengthen interest study somebody. With own interest high learning, someone tend more active, diligent and persistent in face challenge learning, which in turn can increase understanding and achievement academic they in a way whole. Therefore it, understands and stimulates interest Sstudy become important in context education for create environment positive and supportive learning growth intellectual as well as development optimal personality for every individual. From the background behind on so researcher interested for do study degan title “ Learning Interest Analysis education citizenship ( PKn ) Students Primary School (SD)”

## Research Methodology

Method used in this study is review literature systematic. A total of 5 articles have been published published accordingly with theme as answer in this study. Overview literature systematic, frequent known as a systematic literature review, is review literature that follows the rules that have been set in a way consistent for identify and synthesize all relevant studies about something topic certain. This process also includes evaluation to information that has been collected from studies the (Sulaiman & Azizah, 2020). Overview systematic own ability for serve summary or more synthesis informative and also giving analysis comprehensive critical to something topic study.

## Result & Discussion

Research result this obtained after do studies literature and research data obtained is secondary data journal data results about 5 journals study previous . The results of the data obtained can seen in table 1.

**Table 1. Review Document**

Writer	Title	Research methods	Findings
(Dwanda Putra et al., 2023)	Learning Media Analysis YouTube To Liveliness Students and Interest in Learning PKN at Jurugentong State Elementary School	Qualitative Approach	Use of YouTube learning media significant increase liveliness student in Citizenship Education learning at Jurugentong State Elementary School . Student show high interest and concentration in using YouTube videos as tool learning . Plus , enthusiasm student YouTube 's learning media also has an impact positive on interest Study they .
(ainii, 2024)	Influence Environment School Regarding Interest in Learning Students Learning Citizenship Education in Elementary Schools	qualitative	A number of aspect in environment education can influence development interest learning , which is component important from this process. Environment comfortable, safe, and accommodating learning , combined with strong relationship between teacher- student and student- student, will produce experience successful learning .
