Abstract
Research purposes this is for increase performance Study Civics in students educate school base. This study use method literature review. Deep data this study obtained through technique data collection in the form of something conceptual framework or orientation for do analysis or classification facts collected in research carried out from sources references (books, journals, papers). Activity in Study teach is Suite activities that include liveliness student in follow lesson, ask things that haven't clear, note, listen, think, read, and everything activities that can be carried out increase performance study. Study while do activity more lots bring results for child educate, because impressions obtained by children educate more stored inside for a long time thought child educate, so that participants educate school base own ability such as : Thinking in a way critical and rational since early, participate in life society , and have mark culture and character nation. character building is something a must option optimized in system education in Indonesia.

Keywords : Citizenship education in schools base

Introduction
Citizenship Education ( PKn ) in schools base has important meaning for students on formation personal citizens who understand and are capable carry out rights and obligations For become Indonesian citizens who are intelligent, skilled and have the required character in Pancasila and the 1945 Constitution. Civics own role important in instill morals in the participants were raised through planting values positive based on the values contained in Pancasila. Civics education also helps participant educate for understand and implement their rights and obligations as Indonesian citizens who are intelligent, skilled and have character. For increase ability participant educate school base in education citizenship, the role of teachers is very necessary. Teachers must equip and develop mark personal attitudes and morals students , however this no can achieved If student no understand concepts about those values and morals alone. Development mark personal attitudes and morals neither do students can achieved without understanding from concepts the. Citizenship education is also a must done with innovative learning models and interesting media . Learning will more creative and fun, which has an impact on improvement results study civics at school base. Apart from that, education character must integrated in life school, okay in context inside learning class or outside class. Research also shows that education citizenship can make participant educate for understand and implement their rights and obligations as good citizen.
critical is a purposeful process for make incoming decision sense about what are we believe and what we do (Ennis, 1996). When in class applied ability think critical so student will own ability finish problem with more wise as well as effective. This supported with will for participate and ask questions in learning. Apply ability think critical of students need exists treatment specifically by a teacher in class.

**Research Methodology**

This study use method literature review. Deep data this study obtained through technique data collection in the form of something conceptual framework or orientation for do analysis or classification facts collected in research carried out from sources references (books, journals, papers).

Recapitulation percentage of each indicator think creative can seen in the table following this: And from questionnaire that has been filled in by students individually calculated the frequency from every question. From the results processing questionnaire, obtained information that student Enough often Study with a learning model based problem. This matter can seen from 66.67% of students say “yes” that the teacher always give problem when start lesson, where one phase from learning based problem that is problem orientation. It can also be seen that learning based problem, yes give rise
to ability thinking, for one that is think creative. This matter seen from 86.67% of students answer that the teacher always submit question to student when explain. This matter beneficial for students to be able think creative when answering question. As many as 80% of students also answered that they given freedom answer question, so student sued for more creative again in answer. Almost all student show sufficient behavior reflect think creative. This matter seen from 63.33% of students like ask about something lacking material understandable. 23.33% of students always enclose reason when given questions by the teacher, and as many as 53.33% of students always certain with the reason alone. Third matter is reflective activities that student the capable think creative. There are some meaning of Citizenship Education (PKn). According to Adi Winaya (2017), "Civics is eye lesson social purpose for forming or build good citizens, that is New citizens, willing and capable do Good.". Beside that, according to Ananda (2018), Civics is eye lessons that focus on formation citizens who understand and are capable carry out rights and obligations for become citizens who are intelligent, skilled and have character as mandated by Pancasila and the 1945 Constitution. With education citizenship this is the generation young expected own awareness full will democracy and human rights. With provisions awareness this, them will give meaningful contribution in overcome various problems encountered nation, like conflict and violence that occurs in Indonesian society, with peaceful and intelligent ways. Nany B, (2021). Based on Minister of National Education Regulation no. 22 of 2006 Scope eye Citizenship Education lessons for education elementary and intermediate in a way general covers aspects as following:

1. Unity and Oneness nation
2. Norms, laws and regulation
3. Rights basic man
4. Need citizen
5. State Constitution
6. Power and politics
7. Pancasila
8. Globalization

Scope This No without clear goals but, of course become one of means approach to nature education Civics as stated by Magdalena (Magdalena I:2020) that essence Civics in elementary school is as an educational program based on values Pancasila For develop and preserve mark noble and moral roots rooted in culture expected nation become teak realized self in form behavior in life a day day. Deep lesson formation diverse selves from in terms of religion, social, cultural, language, age and ethnicity nation that focuses on formation citizens who understand and are capable carry out their rights and obligations For become Indonesian citizens who are intelligent, skilled and have character as mandated by Pancasila and the 1945 Constitution. With education citizenship this is the generation young expected own awareness full will democracy and human rights. Deep lesson formation diverse selves from in terms of religion, social, cultural, language, age and ethnicity nation that focuses on formation citizens who understand and are capable carry out their rights and obligations For become Indonesian citizens who are intelligent, skilled and have character as mandated by Pancasila and the 1945 Constitution. This is also confirmed by opinion Mardalena (Mardalena SR:2012) essence Civics in elementary school is focuses on formation citizens who understand and are capable carry out their rights and obligations For become Indonesian citizens who are intelligent, skilled and have character as mandated by Pancasila and the 1945 Constitution. Citizenship Education in schools base own objective important in increase ability participant educate. They must understand and implement rights and obligations For become citizens who are intelligent, skilled, and have the character that is mandated in Pancasila and the 1945 Constitution. Hakim, AN, Dewi, DA, & Furnamasari, YF (2021).
2. Build ability think critical, thinking creative, and capable study connection Logistics: Participants educate capable apply experience. For steady knowledge, ability state appreciative to product value culture, capable give signal respect to fellow human, and capable love Indonesian nation and homeland.

3. Build ability in follow learning Civics: On the material education citizenship, participants educate follow learning Civics impressed not enough understand the material presented by the teacher, which is at the end impact on results learn from participants educate.

Lack of ability think critical student in understand concept of citizenship education. Because participant educate stuck just with information conveyed by the teacher, the consequences student Not yet Can implement it in life everyday (Supardi, 2012). Furthermore from information obtained through communication between teachers and students, then There is some are becoming frequent problems appear during activity Citizenship Education learning, namely: (a) Apparently student not enough active and creative at times learning. That matter caused Because lack of ability in grow motivation student in learning, (b) Approach applied learning Still teacher-centered, monotonous, one direction, and no varies, (c) Students feel difficulty in understand material learning, (d) Average results Study Still low. In order to For overcome problem mentioned above, then one did Classroom action research through application of learning models bulk opinion (Brainstorming) with objective research, ie include: For know enhancement results learning and quality Citizenship Education learning student through application of learning models bulk opinions (Brainstorming) on the material learning Pancasila as the basis of the state and state ideology.

Conclusion
Based on research conducted so can concluded that for forming personal citizens who understand and are capable carry out rights and obligations for become intelligent Indonesian citizens. Civic education must planting oriented draft state and nature implementation in life daily. Educational goals citizenship is for enlighten life developing nation Indonesian people as a whole, who believe and are devout to god almighty and virtuous noble character, having ability knowledge and skills, physical and spiritual health, personality steady and independent and a sense of responsibility answer society and nationality.
