Abstract

This study aim for know reason it faded attitude nationalism of the millennial generation while knowing how to ways that can arouse their nationalist attitudes through Education Pancasila and citizenship as well as roles family, education, and the government in awakening the spirit of nationalism. The method used in this research is literature study by referring to sources such as journal articles, books and articles from the Internet. The results of this study indicate that the cause of the fading the nationalist attitude of the millennial generation is caused by 2 factors: factors internal and factor external. Factor internal covers there is flavor disappointed from in self a millennial, for example flavor disappointed to performance government. External factors include the development of globalization which cause lots change. Method grow attitude Millennial generation nationalism can be done by getting used to it using domestic products, providing insight into the importance of having a spirit of nationalism, as well as equipping them with give material about attitude nationalism and defend country through education pancasila and citizenship.

Keywords : Nationalism, Civic education, Millennials

Introduction

This article aim for describe and explain business in grow the nationalist attitude of the millennial generation through Pancasila and Citizenship education, Nationalism comes from the word nation which means nation, the meaning of the nation itself also has meaning: (1) unity, which means unity between various type, custom, ethnic group, and culture; (2) human groups, namely having the same origin; and (3) a group of people who bound by the unity of language and culture which usually occupies a particular region in something region the (Kholida, 2020). Term nationalism that alone also own meaning alone that is awareness for love, maintain, and fight for nation indonesia, as well as own awareness membership that potentially together maintains, perpetuates identity, integrity, prosperity, and strength nation. Attitude nationalism is attitude build and maintain awareness in the state, foster an attitude of love land water, and fight for wholeness nation Indonesia (Salminati, 2017). Indonesia is known for its various ethnicities, cultures, races and religions: rich in culture and natural resources. Indonesian citizens are also known as polite and friendly attitude. Even though they have different beliefs, they are still one also maintain and continue to maintain the integrity of the Unitary State of the Republic of Indonesia. However, exists development era which the more proceed make start disappearance attitude nationalism. The development of this era has encouraged the influx of globalization very fast. This of course also resulted in major changes for the country and public. There are two impacts of this phenomenon for the country and society itself. These two impacts are positive impacts and also negative impacts. One impact the positive that is development technology which the more proceed and knowledge we become proceed. The negative impacts are numerous. One of them is the entry of foreign culture which influence style life public become more westernized: it faded attitude manners and also social customs. Technological advances also have an impact on lifestyle public. They more know culture outside from on culture original they Alone, especially in today's millennial generation children. They prefer K-pop and imitate the

style outdoor living. For example, they are currently more addicted to cellphones, such as playing tick- tok and watch Korean dramas, and there are also quite a few who imitate the styles or Fashion Korea. Matter the of course no can left continuously. Must There is breakthrough so that they no forget diversity which there is in Indonesia with embed attitude nationalism. This is because the sense of nationalism includes having a view positive and optimistic: an attitude that can be instilled in children from an early age (Aulia, Goddess, & Furnamasari, 2021). In cultivating students' attitudes of nationalism is of course the main concern for educators. Namely raising awareness of the importance of having an attitude of nationalism and also form character as well as civilization nation which dignified, through education Pancasila and citizenship and teaching and making students aware of their contribution build nation Indonesia in diversity based on mark Pancasila. On article this discuss about role education Pancasila and citizenship in fostering a nationalistic attitude in the millennial generation through awareness of the importance of attitude nationalism, and also aware of the importance of the role of the younger generation in growing flower nation Indonesia (Arafik, 2014).

Research Methodology

In this research I used the library research method. Studies literature is something studies which used in gather information and data with help various type material which there is in library, form book, magazines, documents and historical stories and also use reference sources like article and journal scientific. Processing source references which has obtained furthermore customized with formulation the problem raised in this research concerns the attitude of nationalism held by generation young in Indonesia. Analysis advanced done with do election and adjustment with sort and do analysis advanced, then withdraw it conclusion.

Result & Discussion

This journal discusses the role of Pancasila education and inner citizenship grow flavor nationalism generation millennial, because education no only obtained from parents alone, the role of educators is also very important in the environment school, the essence of education. The essence of education is to equip students with knowledge knowledge, intelligence, technology and forming an identity based on a value system Pancasila. Explanation of Law no. 20 of 2003 concerning the national education system is a point important in fostering a sense of nationalism through citizenship education with to form citizens who love and have a sense of nationalism towards the high nation. Education citizenship is placed in an operational context to produce the younger generation which based outlook nationality (Sastradipura, Goddess, & Furnamasari, 2021). One thing that educators do is foster an attitude of nationalism students, namely by providing insight into the importance of having feelings nationalism for the current generation for future generations, as well as forming character child in accordance with values which there is in Pancasila, tell and provides an overview of how the history of the Indonesian nation was able to stand up to today. So that they can learn to sacrifice for their homeland, love for the Indonesian nation and also towards others, respecting differences, forms of nationalism, namely love state, maintaining national sovereignty, understanding diversity, and understanding the rule of law which applies (Retnasari & guidance, 2020). By because that, important very role education Pancasila and citizenship in equipping the millennial generation with nationalism reach individual which own flavor nationalism tall. Pancasila and citizenship education is very important to awaken the nationalist attitude of the millennial generation. Education Pancasila and citizenship alone own objective for: (1) Think critical and creative in respond issues citizenship (2) Participate and responsible answer and act in a way intelligent in activity social, nationality, and patriotic (3) Develop in a way positive and democratic in form self based on character public Indonesia so that can life side by side with nations other (4) Interact with other nations in the world arena directly or indirectly by utilizing information and communication technology.

The Fading Nationalist Attitude of the Millennial Generation

The development of globalization has created many changes, one of which is change in field technology, information, and communication which the more advanced. With exists the flow of globalization has brought many changes to our country, namely indonesia makes it easier for us to communicate and do anything via internet access, with exists progress technology which the more advanced make we with it's easy see the whole world with just the palm of your hand, namely via gadgets. We can follow development era which currently trend in outside. we as public millennial must be clever in using technology so as not to be carried away by the negative currents of globalization (Lestari, 2019). As public Indonesia we must guard wholeness country unity republic Indonesia by becoming a smart millennial generation, and loving Indonesia's homeland, and upholding it the high value of unity, the decline in the nationalist attitudes of the millennial generation is caused by the development of the times and

technology that is starting to advance, which is not balanced by the lack of its understanding of the culture and history of the Indonesian nation (Widiyono, 2019). Generation Millennials prefer foreign cultures or western culture, for example, currently there are many very young people who more like and use products outside (Kiranantika, 2020). Furthermore, the younger generation is also reluctant to uphold local Indonesian culture, for example like learn and memorize songs area or songs national, they more memorize with songs west. The younger generation prefers to imitate western styles, which are far from the norm customs of the Indonesian people. They also don't like our own country's products because they think the quality of their products is much better than foreign products and products The outside is more in line with the times. Apart from that, there is prominent behavior among people students like to stay up late and do things that are not useful, abuse drugs, promiscuity, even referring to free sex, likes playing truant, and even brawls which resulted in the loss of life. This indicates that the taste is getting thinner unity and unity fellow student which refer on it faded flavor nationalism.

Efforts to overcome the decline of nationalism

Role Family

The family has an important role in forming a child's character, because within family child get education for first time, family also very role in supervise and also shape the character and behavior of children. The role of the family in formation a sense of nationalism in children, namely by providing education from an early age regarding attitudes nationalism and patriotism towards the Indonesian nation, accustoming children from an early age to using domestic products so that children can get used to using the products in country (Aswasulasikin, Praise, & Hadi, 2020).

Role of Education

Role education that is give education Pancasila and citizenship, and also give material about defend country give instruction and also provision material to students, and also instilling an attitude of love for the country in students, for example carry out flag ceremonies every monday and every national holiday, teaches students to respect the services of heroes. Providing moral education, so that student no easy absorb things negative in outside there.

Role of Government

The government also plays a big role in fostering an attitude of nationalism generation millennial, because government is something role model for public which is at in lower shade government that alone good in matter regulation nor policy which given. Wrong one matter or policy which can help in effort awaken attitude nationalism generation millennial wrong the only one that is with, stage various type activities that can foster attitudes of nationalism and patriotism such as holding seminar activities and cultural exhibitions, require civil servants to wear batik once a week, because batik is a cultural work indonesia, the government must also listen to and respect the aspirations of the younger generation for build indonesia so that more good again.

Conclusion

The term nationalism itself also has its own meaning, namely awareness of love, maintain, and fight for nation indonesia, as well as own awareness membership which in a way potential together maintain, immortalize identity, integrity, prosperity and strength of the nation. The attitude of nationalism is attitudes build and maintain awareness in the state, foster attitudes love land water, and fight for wholeness nation Indonesia. It faded attitude generation millennials are caused by 2 factors, namely internal factors and external factors, internal factors some of which are caused by personal factors such as youth disappointment with government performance, and the second is external factors which refer to the development of globalization brought a lot of impact to change. One effort to raise awareness of the generation In order for millennials not to lose their attitude of nationalism, they must cover several roles such as roles family, role education, and role government.
